

# Software update.

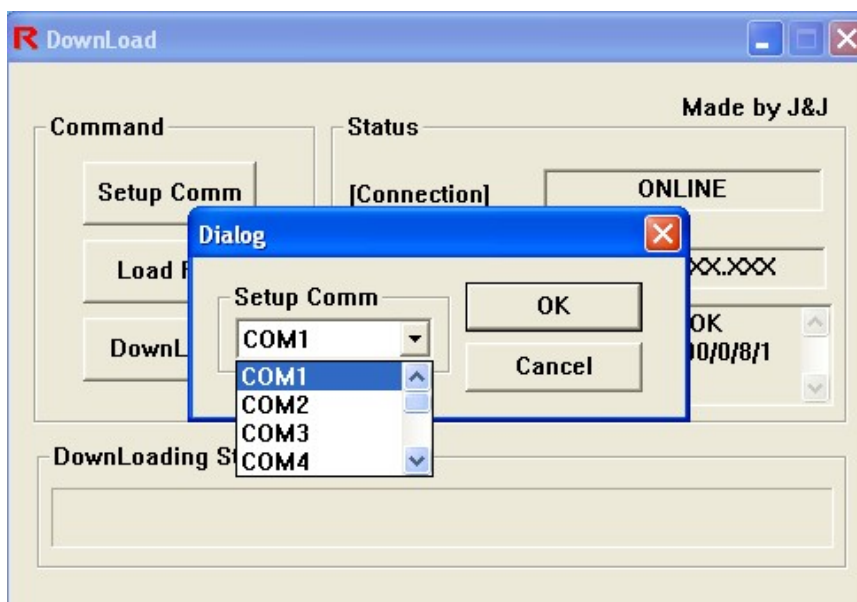

How to update software for DVB C1, S1, T1 series, TTR 150 and LDR 270T

1. Use a RS 232 null-modem cable with Male/Female connectors (Part no:300767).  
Download and install the Loader program "Download.exe" on you PC.  
Download and save the software file (e.g. DVBT1\_131\_20060627.dnl) which is used for updating.  
The files are "compressed" with Winzip so you must "uncompress" them before use.
2. Disconnect mains power to the receiver. Connect the RS323 cable between you PC and receiver.
3. Start the Loader program "Download.exe".

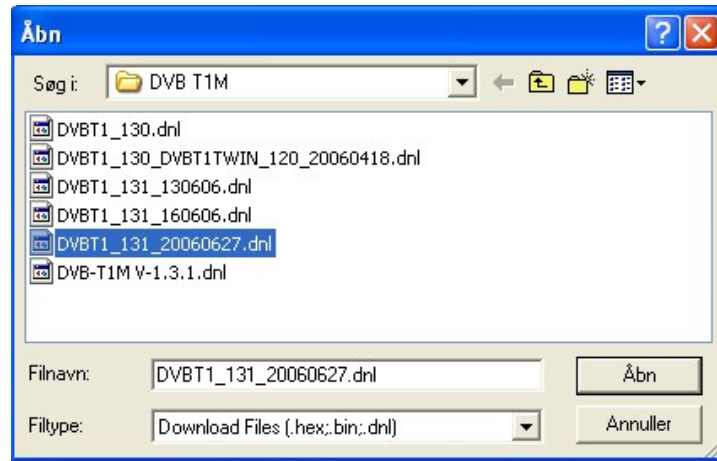

Navn	Størrelse	Type
Download.exe	220 KB	Program
DVBT1_130_DVBT1TWIN_120_20060418.dnl	1.029 KB	DNL-fil
SOFTWARE-UPDATE.pdf	57 KB	Adobe Acrobat 7.0 ...

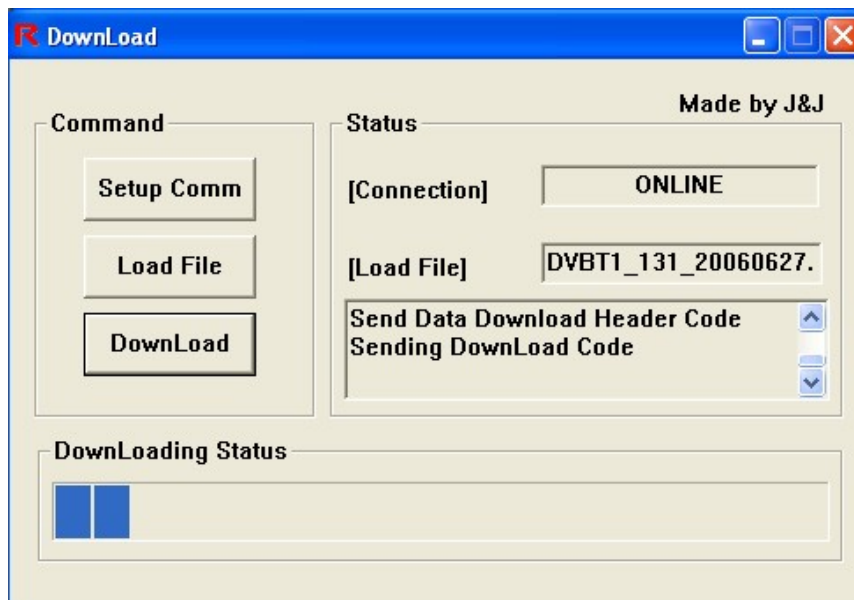

4. Select com port by pressing "Setup Comm"

5. Select the software file by pressing "Load File" and press "Open"

6. Press "DownLoad", then connect and switch on mains power (230VAC) on your receiver, to start download of software.

7. The software download has completed. Press "OK" and close the program.
